Engineering - Fabrication & Fitting - Super Profits!!

Here is a unique opportunity to purchase a very profitable engineering business with significant potential for upside growth Originally established 30 years ago, it has carved out a solid, consistent reputation for getting the job done. It has a great blend of small, medium & large projects across a board range of clients, both repeat business and one-off projects. Welding, pressing, folding, machining, structural and non-structural work, this business will find a solution. And because it has a solid reputation it often gets the high margin remedial work where others have failed. Excellent business processes, experienced staff and fantastic working culture has created a model and working environment the envy of many. It has a significant pipeline of future orders and excellent opportunities for growth. An astute buyer can either maintain the status quo and reap a significant income from a business that is already semi self-managed or put the resources into the business to take it to the next level. EBPITD Conservatively the FTE for 2019 is projected to exceed $400k (we are awaiting the 2019 annual accounts from the Accountant). Asking price: $895,000 which includes plant and machinery and stock. If you are interested and would like more information about this business, visit www.barkerbusiness.co.nz/BBS2487, register your details and submit the online Confidentiality Agreement.
