## Highly Profitable Managed Service Business

Known as an expert in their field, this well-established and highly recommended business currently services bodies of water including ponds, rivers, lakes, streams and so on.

With no job being too big or too small, they have built strong relationships with their client base, which is largely made up of councils, golf clubs and more. This business has on-going work all year-round - servicing Auckland to Northland with nothing stopping a new owner from taking this nationwide.

The current owner works a few hours a week at most, otherwise this managed business only utilises staff as required keeping the already low overheads even lower.

Having a diverse and varied range of assets, some proprietary and valued at around $210k, ensures anything required to get the job done is available.

Traditional methods of performing this kind of work is often twice the price with other players, however as a result of my vendor's clever engineering, costing of jobs is now more reasonable = more work! He is now moving overseas which forces the sale of this fruitful opportunity however he is open to a solid handover period.
