Work from Home, Minimum Input, Maximum Output!

Work from Home, Minimum Input, Maximum Output!

With the current owner working just 2 days a month from a home office and no employees, this fully relocatable business is returning a good cash surplus. The 2016 and 2017 EBIT was over $200K and is continuing to tack nicely.

The business is a telecommunication service provider, delivering broadband, VoIP, audio/video/web conferencing and toll calling & landline services, to a diverse range of customers, nationwide, utilising the major telcos.

The owner now wants to focus on other business interests and has indicated he will offer the new a thorough handover period. He suggests that if a new owner were to invest more hours into growing the business, you could seriously add to the bottom line.

This exciting opportunity won't be on the market long so enquire today!

Asking $465,000.
